

1 in 37 people alive today in the UK will be diagnosed with Parkinson's in their lifetime.

Parkinson's progresses relentlessly becoming increasingly debilitating over time. There is no cure and no test for diagnosis, highlighting the urgent need to better understand what goes wrong and leads to Parkinson's disease.

Today's guest speaker on Have We Got Planning News For You, Marc van Grieken has now lived with Parkinson's for some 17 years. He is also a 'patient advocate' and fundraiser.

We would greatly welcome donations to support summer research studentships in the [MRC Protein Phosphorylation and Ubiquitylation Unit](#) at the University of Dundee, the UK's top ranked University for Biological Sciences ([REF 2021](#)). These studentships attract talent from across the UK and successful candidates benefit from the conceptual and ongoing input from people affected by Parkinson's within the [Dundee Parkinson's Research Interest Group](#) (www.DRIG.org.uk) part of Parkinson's UK's Research Support Network. Working together will help solving the Parkinson's puzzle.

Please make your donation to:

Account name:	Neurodegeneration Research Fund University of Dundee – Main Account
AccNo:	00279732
Sort Code:	83-50-00
And importantly quoting reference:	117276
